PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with over 6 years of experience architecting and scaling high-performance web applications across Fintech, Healthcare, and EdTech sectors. Specialized in **TypeScript, Next.js, React, Node.js, NestJS, and AWS**. Proven track record of delivering end-to-end solutions—from multi-tenant SaaS platforms to complex microservices and payment workflows—while leading teams in Agile environments. Skilled at transforming product vision into maintainable, scalable, and WCAG-compliant software.

SKILLS

- **Languages & Core:** TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, SQL
- **Backend & APIs:** Node.js, NestJS, Express.js, RESTful APIs, GraphQL APIs, Microservices, Socket.io, JWT Authentication, Stripe API (Payments & Billing)
- **Frontend Frameworks:** Next.js, React.js, React Native, Tailwind CSS, Shadcn, Material UI, Bootstrap
- **Databases & BaaS:** PostgreSQL, MongoDB, MySQL, Neon (Serverless Postgres), Supabase
- **DevOps & Cloud:** Git, CI/CD Workflows, Doppler (Secrets Management)
- **Architecture & Process:** Multi-Tenant Architecture, System Design, Agile / Scrum Methodologies

EXPERIENCE

Senior Full-Stack Engineer InvoZone

Sep 2021 – Present

- **Architecting and developing** scalable, multi-tenant enterprise platforms—including entertainment (Phynd TV) and educational systems (Alnayzak, MilTech LMS)—using Next.js, NestJS, Node.js, and AWS, reducing core application response times by 30%.
- **Engineering** high-performance e-commerce storefronts and fintech applications (Gul-e-Raana, Orenda) using Next.js 14, PERN stack, and secure PayFast payment integrations, driving smooth user onboarding and sub-second page transitions.
- **Designing and deploying** robust microservices and RESTful/GraphQL APIs, maintaining 99.9% application uptime and WCAG accessibility compliance across web interfaces.
- **Optimizing** frontend bundle sizes and database query structures across MongoDB and PostgreSQL, improving overall site performance scores by 40%.
- **Leading** cross-functional sprint workflows in Agile/Scrum environments, collaborating with product managers and engineers to meet delivery deadlines on 2-week sprint cycles.

React & React Native Developer Eritheia Labs

May 2021 – Aug 2021
Lahore, Pakistan

- **Developed and delivered** commercial web and cross-platform mobile applications using React, React Native, and JavaScript within strict 4-month client deadlines.
- **Engineered** reusable UI component libraries and integrated backend REST APIs, reducing UI bug reports by 25% and maintaining consistent design systems.
- **Optimized** app navigation and state management using React Navigation and Redux, achieving smooth 60 FPS performance across iOS and Android devices.
- **Collaborated** closely with UI/UX designers to translate wireframes into pixel-perfect, responsive client interfaces.

Full-Stack MERN Developer Wakandha

Dec 2020 – Mar 2021

- **Spearheaded** full-stack development for a social networking mobile platform using MongoDB, Express, React Native, and Node.js over a 4-month project timeline.
- **Managed** a developer team by conducting daily standups, delegating sprint tasks, and reviewing pull requests to enforce clean code standards.

- **Implemented** real-time messaging, notification systems, and secure user authentication using WebSockets/Socket.io and JWT.
- **Optimized** MongoDB aggregation pipelines, cutting media feed loading times by 35% for active concurrent users.

PROJECTS

Orenda Financial Services – Enterprise Fintech Platform

- **Technologies:** Next.js, React.js, Node.js, TypeScript, Microservices, MongoDB, Stripe API
- **Live Demo:** orendamonovate.com
- Developed core banking modules and transaction dashboards for European and New Zealand financial markets (CarditEasy, Monovate).
- Implemented **Stripe API** for secure multi-currency payment workflows, automated recurring billing, and real-time transaction verification.
- Refactored monolithic backend services into containerized microservices, improving platform stability and fault tolerance.

Gul-e-Raana – E-Commerce Storefront & Admin Portal

- **Technologies:** Next.js 14, PERN Stack (PostgreSQL/Neon), Express.js, Node.js, Stripe, Tailwind CSS
- **Live Demo:** guleraana.shop
- Designed a high-volume e-commerce storefront with role-based admin controls for product inventory, dynamic order tracking, and sales analytics.
- Connected Neon (Serverless Postgres) for high-availability database queries and sub-second inventory sync during high-traffic promotional events.

Alnayzak – Horizons Academy Management Platform

- **Technologies:** Next.js, React.js, TypeScript, Tailwind CSS, Zustand, RESTful APIs
- **Live Demo:** portal.horizons-pal.net
- Built dynamic frontend interfaces for a multi-role educational administration suite serving admins, teachers, staff, and students.
- Managed complex client-side application state using Zustand, streamlining data caching and minimizing unnecessary UI re-renders

Appwork – Property & Maintenance Management Suite

- **Technologies:** Next.js, React.js, Node.js, Express.js, MongoDB, Bootstrap, RESTful APIs
- **Live Portal:** residents.apprent.com
- Developed web portals and API integrations for connecting property managers, maintenance technicians, and residents.
- Built real-time maintenance ticket dispatching and tracking workflows using RESTful API endpoints and WebSocket channels.

MOBILE PROJECTS

Namaz Tracker Assistant – Cross-Platform Mobile Application

- **Technologies:** React Native (0.82), React 19, TypeScript, React Navigation, Zustand, Notifee, AsyncStorage
- **Live App:** [Google Play Store](https://play.google.com/store/apps/details?id=com.namaz_tracker)
- Published a feature-rich mobile utility app with offline-first local storage (AsyncStorage) and location-based dynamic prayer scheduling.
- Implemented push notification triggers using **Notifee** and responsive dark/light theme switching via Zustand.

Films Plex – Media Discovery & Video Interface

- **Technologies:** React Native / React, TypeScript, YouTube Player SDK, REST APIs, UI Component Architecture
- **Live App:** [Google Play Store](https://play.google.com/store/apps/details?id=com.films_plex)

- Engineered an interactive media consumption interface featuring floating/minimized YouTube trailer playback and responsive media cards.
- Implemented client-side state caching, dynamic search indexing, and real-time content filtering across thousands of titles.
- Optimized navigation routes and asset loading to eliminate rendering lag and frame drops during high-density image browsing.

EDUCATION

Bachelor of Science in Computer Science (BSCS Hons.)

2017 – 2021

COMSATS University, Islamabad | *2017 – 2021*

Intermediate in Computer Science (ICS)

2014 – 2016

Superior Group of Colleges

Mmm, YYYY
